1.133.0 Release Notes

> Release date: 2026-07-01

Fixes

- When submitting 2FA codes, especially for payment method updates the system now auto submits when the code is entered rather requiring an additional click.
- For those clients that are using the new payments flow, the Proof Of Payment column is now added to CSV export
- Moreover, erratic behaviour in the new Payments page was not remembering the column chooser options. This is now resolved.
- We have rolled out a number of changes on tables throughout the system, allowing for pinning and moving.
- Small bug fixes and UI improvements across the platform.
