

1.43.0 Release Notes

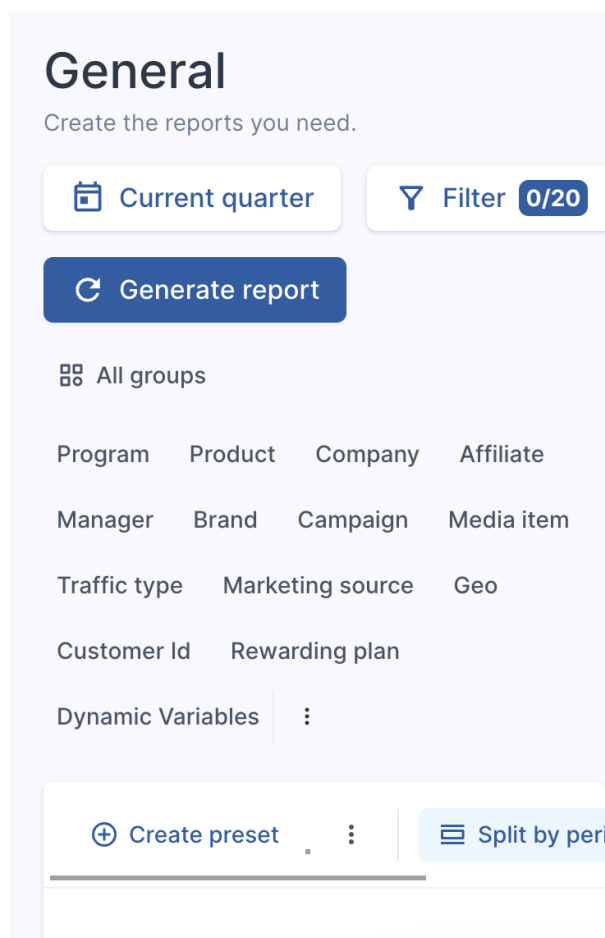

Release date: 2023-11-01

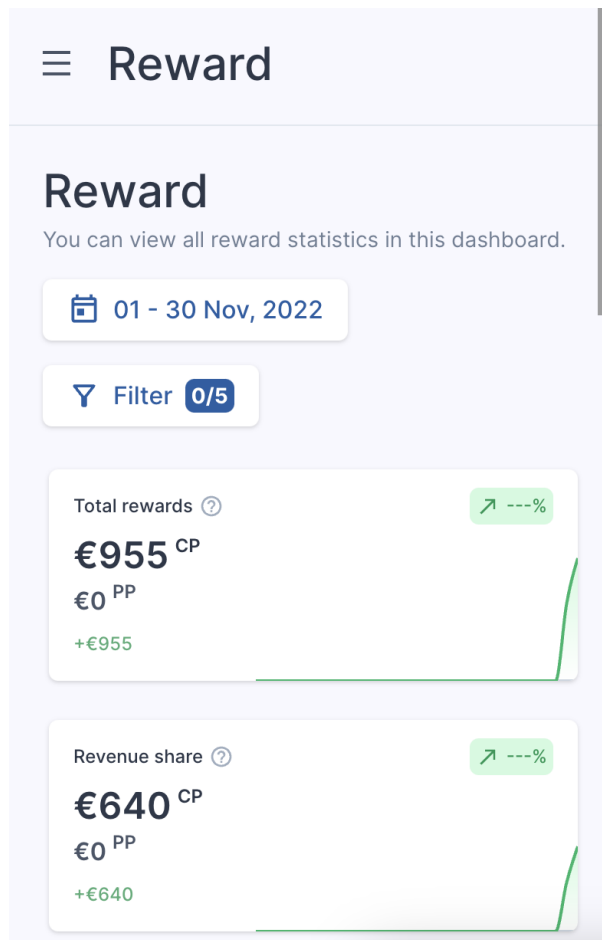

New Functionality

Mobile Responsiveness

The system is now fully capable of being run via your mobile or tablet. Thus, allowing you to check statistics, change reward plans and even to check reports whilst on the move.

Examples:

CSV Extraction in Customers Page

It is now possible to extract the customers page in full via CSV.

Fixes

- Player Username is no longer shown to affiliates due to security reasons.
- When extracting CSV in summary form or with Statistic toggle, previously the CSV extract would always pull statistics and summary regardless if the statistic toggle was enabled or not. This has now been fixed and will extract only the summary or summary and statistics depending on the choice.
- A number of CSV extractions have been improved, in both their structure and cleanliness.
