

1.52.0 Release Notes

Release date: 2024-02-08

New Functionality

Sub-Affiliation

Sub-affiliation is now available! Giving users another potential stream of affiliate sources and rewarding capabilities!

Sub-affiliation is setup in the following way;

1. A 'brand' is added to the system called 'ReferOn'.
2. A campaign should be available for the ReferOn brand using the URL of affiliate program registration link.
3. You can proceed in creating a media item from the campaign
4. Deal at tracker level can be adjusted, similar to others.
5. After sign up, parent ID will also be visible in Affiliate Management screens.

Email Triggers

Signing up to an affiliate program now comes with a small notification on signups, approval and decline messages when they happen within the system.

The email templates are fixed currently and a later release will make them customisable by the programs.

The content is as follows:

Signup:

Thank you for signing up to **%Program Name%**. An affiliate manager is now reviewing your

application and you will hear back shortly.

Approval:

Your application has been approved. You may now log into the following URL **%Affiliate Login URL%** and start using ReferOn.

Decline:

Unfortunately, your application was declined. Should you have any queries, please contact the affiliate team.

Fixes

- Resolved an issue where the Click to FTD metric was inaccurately displaying 0%. We have updated the metric to display decimals and removed rounding for accuracy.
- Small bug fixes and UI improvements across the platform.
