

1.54.0 Release Notes

Release date: 2024-03-11

New Functionality

Brand Visibility Enhancement

All brands are now displayed in the summary page for the program, rather than just the brands you are promoting already. This will give more visibility on the full list of brands available.

Last Month Date Range Addition

This has been added based on customer feedback.

You now have the option of viewing the last month via a preset date selection allowing for quick looks on past month statistics without needing to customise the date range each time.

2FA Accessibility Enhancement

All users now have the ability to reset the 2FA authentication. Previously only admin users could reset the authentication for affiliates, but in this release an affiliate is now able to reset from their side as well should they need, giving more power back to the users.

Two factor authentication

Two factor authentication (2FA) protects your account by requiring an authentication token in addition to your regular credentials.

☒

Fixes

- We have updated metrics in reports and introduced new ones to give more and better insights into the statistics in the platform - Deposits per FTD, ALL deposits/Active Customers and improved logic of Deposits per FTD calculation.
- We have fixed display of percentages, which sometimes produced an error in results.
- Sorting in media item list and statistics and also statistics in affiliates is now available.
- We have added Product column in campaign list export.

- There are new filters added to Media - Campaigns: Count of media items and Count of banners to give more options in finding the right campaign for you.
