

1.68.0 Release Notes

Release date: 2024-08-07

New Functionality

New Table Design

This design concept is still considered to be in BETA and as such has not been rolled out to all areas. We appreciate any feedback you may have.

We have done a number of table improvements in the following areas:

- Customers

Features added:

- **Column Pinning (pin icon):** You can now select any column and pin it to the far left. Default order of pinning is based on time of pin. Unpinning a column put them back into their original state.
- **Column Rearranging (grab and drop):** Grab column and rearrange order freely. If pinned, they will stay to the left.
- **Hiding columns (eye icon):** This is the same as Column Chooser, but now this is more accessible on each column.
- **Pagination revamp:** Previously found at the bottom of every page, page selection and items per page is now found to the top right, removing the clunky workflow when different item counts are loaded and going to different pages became a hassle of next page and scroll down.

Customers

Manage customer reward plans.
