

1.78.0 Release Notes

Release date: 2024-12-05

New Functionality

Qualified CPA Postbacks

This is it. The feature you have been waiting for - CPA Postbacks!

You can now contact your affiliate manager at ReferOn to apply Qualified CPA postbacks if you have the setup for it.

This will link directly with CPA triggers, so no matter the conditions, i.e. thresholds, day limits or caps, when cpa count is flagged the postback will fire.

As this is linked to CPA rewarding, this is limited to the reward calculation timeframe. If untouched, this will be **once a day**. For more frequent sending, please speak to your affiliate manager.

Affiliate Payment Table

In light of the upcoming changes to the payments area, we have rolled out a new table for Affiliates showing the payments that are available to them giving the affiliate more visibility on their payments.

This area is limited to Master level access only.

Payments

Create, track and manage all payments.
