

1.94.0 Release Notes

Release date: 2025-06-17

New Functionality

Payment Method Tab

As a reconfiguration, more than new functionality, we have redesigned how to handle payment methods within an affiliate account and its company. Instead of navigating within the Edit screen for a Company, instead there is a Payment Method tab in the Company account.

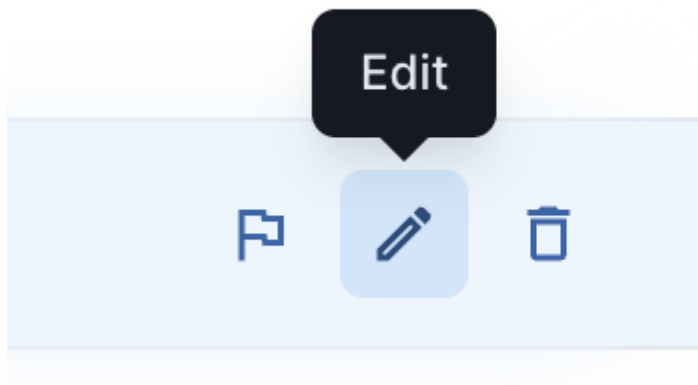

The screenshot shows the 'Payment methods' tab for the 'Huel Group' account. The header includes the company logo 'HG', name 'Huel Group', and various account details like '3121 Demo', 'Invitation link', and 'UID'. It also shows statistics: '2 affiliates', '28 media campaigns', and '97 media items'. Below the header, there are tabs for 'Affiliates' and 'Payment methods'. The 'Payment methods' tab is active, displaying a table of payment methods. The table has columns for NAME, STATUS, ATTACHMENTS, DETAILS, and AFFILIATES. There are three rows: 'Cryptocurr...' (Default, Verified, BTC, ERC20, 12345, 0 affiliates), 'EcoPayz' (Verified, test, 1232138465316854615 gfvbdfv, 0 affiliates), and 'Skrill' (Not Verified, test@pm.com, 15648532, 2 affiliates). A 'Create payment method' button is visible in the top right corner of the table area.

NAME	STATUS	ATTACHMENTS	DETAILS	AFFILIATES
Cryptocurr... Default	Verified	—	BTC, ERC20, 12345	0
EcoPayz	Verified	—	test, 1232138465316854615 gfvbdfv	0
Skrill	Not Verified	—	test@pm.com, 15648532	2

Functionality remains the same, but redesigning this method allows an improved access and management.

The following quick actions are available from this screen:

- Set Default Method (if not already default)
- Edit
- Delete

Fixes

- Small bug fixes and UI improvements across the platform.
